West Item: Aluminum Seal with or without Flip-Off® Button

1 INTRODUCTION

This Compliance Bulletin provides key information requested by customers on the West Pharmaceutical Services (West) item herein. This information is based upon declarations from supplier(s), offered in good faith and is not to be considered a warranty or quality specification. Because final conditions and use of this item are beyond our control, this information should not be substituted for customer's own compliance determinations and tests to assure this item is appropriate for any end use. Appendix A lists the West manufacturing sites in scope of this bulletin.

Compliance Bulletins are provided upon customer request. Please accept this in lieu of West completing questionnaires or surveys. If you have additional compliance questions as a result of an Agency request, please provide West's Regulatory Team an appropriately redacted copy of the Agency's request with reference to the applicable legislation for review and a response will be provided.

This revision shall remain valid unless a change is made to a product or process impacting the statements herein. Change notifications, where required, are managed in accordance with West's change control process.

2 ADDITIVES OF CONCERN

The following additives of concern are not intentionally added to the item:

- Aflatoxins
- Dioxins
- Genetically Modified Organisms
- Gluten
- Glycerine or oils derived from the Jatropha plant
- Lactose
- 2-Mercaptobenzothiazole (2-MCBT)
- Nitrosamines
- Parabens
- Polyvinylchlorides
- Thiuram

The following additives of concern are present in the item:

- Alcohol: One or more raw material(s) used in this item contains Alcohol.
- Bisphenol A (BPA): One or more raw material(s) used in this item contains BPA.
- Butylated Hydroxytoluene (BHT): One or more raw material(s) used in this item contains BHT.
- Phthalates: One or more raw material(s) used in this item contains Phthalates.
- Polycyclic Aromatic Hydrocarbons (PAHs): One or more raw material(s) used in this item contains PAHs.

West's position on the following additives of concern:

- **Allergens and Excipients:** There is currently no requirement to restrict or ban the use of these substances. Therefore, a general statement regarding Allergens cannot be generated.

DocuSign Envelope ID: B634E05E-D069-4453-9714-1624F0333627

- **Metal Catalyst:** The EMEA/CHMP/SWP/4446/2000 (Limits for Residues of Metal Catalysts) is applicable to drug substance and excipients. In the scope of the guideline, metal catalysts are referred to as substances used in the synthesis of the drug substance or an excipient used in medicinal product. Therefore, West has not evaluated metal catalysts.
- **Genotoxic Impurities:** Agency and ICH guidelines on genotoxic impurities provides a general framework and practical approaches on dealing with genotoxic impurities in new active substances. For this reason, the guideline is not applicable.
- **Residual Solvents:** The focus of the ICH *Impurities: Guideline for Residual Solvents*, Q3C is on the solvents typically used for purification processes in the synthesis of active substances and in subsequent manufacturing steps (e.g. granulation for tablets) of the finished dosage forms. This does not apply to the manufacturing of pharmaceutical packaging components. Therefore, West has not undertaken reviews on with regards to the residual solvents defined in the ICH Guideline and thus, cannot certify.
- **GMO Genetically Modified Organisms:** The guideline EMEA/CHMP/BWP/135148/2004 (Environmental Risk Assessments for Medicinal Products Containing, or consisting of, Genetically Modified Organisms) and such related guidelines relate to medicinal products, specifically to the active ingredients and excipients a medicinal product is made. Therefore, the guideline is not applicable.
- **Melamine:** The FDA Guidance for Industry Pharmaceutical Components at Risk for Melamine Contamination states manufacturers of finished drug products test for melamine in at-risk components before they are released for use in the manufacture or preparation of the drug products. The referenced item is a secondary packaging component with no direct contact with the drug product. Therefore, this guidance is not applicable to this item.

3 FOOD REGULATIONS

For the seals, which are used as secondary packaging components with no contact to the product, compendia, food or other specific regulatory requirements are not defined. Therefore, Food Regulations are not applicable to this item.

4 ELEMENTAL IMPURITIES (ICH Q3D)

- **ICH Q3D: Guideline for Elemental Impurities, dated 26 April 2022**

ICH Q3D guidelines apply to applicants of final drug product but recognize direct and/or indirect sources of metals from excipients, catalysts, components of container closure systems and drug manufacturing equipment. This guideline is not applicable to secondary packaging components, such as this item.
