Dear Customer

Subject: Commitment to Compliance with the European PPWR (Packaging and Packaging Waste Regulation)

Dear Customer,

We would like to confirm our full commitment to ensuring compliance with Regulation (EU) 2025/40 on packaging and packaging waste (PPWR), which entered into force on February 11th, 2025, and will become mandatory as of August 12th, 2026.

The PPWR introduces clear and binding requirements covering the entire lifecycle of packaging, with the aim of reducing packaging waste, promoting reuse, increasing recyclability, and supporting the transition toward a fully circular economy.

Our Commitment

As a company specialized in the design and supply of packaging, we confirm that:

1. We are reviewing all our processes to meet PPWR sustainability requirements

The regulation requires that packaging be designed to minimize environmental impact, contain reduced levels of hazardous substances, and meet minimum recyclability performance classes.

We are currently assessing materials, processes, and design according to Design for Recycling criteria.

2. We support our customers in preparing the Declaration of Conformity (DoC)

The PPWR requires a Declaration of Conformity (DoC) for every packaging item placed on the EU market by August 2026.

We will provide all necessary technical documentation and relevant information to our customers.

3. We collaborate to ensure recyclability and compliant labeling

Starting in 2028, harmonized labeling will become mandatory to support proper sorting of packaging waste.

We are available to work with our customers to ensure that all packaging is traceable and correctly labeled according to EU standards.

4. We are committed to progressing toward reuse and increased circularity

The PPWR introduces progressive reusability targets, including a minimum of 40% for certain transport packaging by 2030.

We will continuously monitor regulatory developments and collaborate with our supply chain to evaluate reusable solutions whenever technically feasible.

Our Operational Plan

To ensure continuous alignment with the regulation, we have already initiated:

analysis of all materials used in packaging;

implementation of PPWR technical requirements in the design of new packaging;

preparation of the necessary documentation for our customers;

ongoing monitoring of delegated acts and guidance issued by ECHA and the European Commission.

Collaboration with Our Customers

We recognize that the PPWR affects the entire value chain.

For this reason, we are available to:

participate in dedicated technical meetings,

share updates on our progress,

jointly assess potential packaging modifications,

support the preparation of DoCs and all required documentation.

Conclusion

We reaffirm our commitment to ensuring a smooth, compliant, and transparent transition to the new European packaging standards.

We remain at your disposal for any technical clarification or specific request.

Kind regards,

Marco Braccini
