Dear Customer,

We refer once again to your request for blanket confirmation that the films we supply meet all the requirements of the Packaging Ordinance (EU) 2025/40 ("PPWR") with the agreed specifications. After (re)examining the matter carefully, we remain of the opinion that our film does not constitute packaging within the meaning of PPWR Art. 3 (1) No. 1. Rather, it is only when the film is processed (die-cut, filled, and sealed) in your company together with other materials and components that it becomes packaging in accordance with PPWR. In our view, the film is to be understood as packaging material in accordance with the agreed specifications. This means that, on the one hand, the film we supply does not have to meet all the requirements of the PPWR and, on the other hand, Liveo Research could not meet all the requirements anyway due to the processing steps that only take place on your premises (e.g., carrying out the conformity assessment procedure and issuing a declaration of conformity). This applies, for example, to the requirements for recyclability and minimum recycled content in plastic packaging for primary packaging that comes into direct contact with medicinal products, which do not apply to primary packaging and thus to the films supplied by Liveo Research (see, for example, Art. 6(11)(a) PPWR and Art. 7(4)(a) PPWR in conjunction with Art. 1 No. 23 Directive 2001/83/EC). This is another reason why a blanket statement does not seem appropriate.

In addition, numerous requirements and obligations under the PPWR are subject to a phased entry into force. Finally, some requirements and obligations must first be specified by the EU by means of delegated acts and implementing acts (by that time).

For these reasons, it is therefore not possible to issue such a blanket confirmation that goes beyond the obligations for suppliers of packaging materials under Article 16 PPWR and disregards exceptions under pharmaceutical law. However, we can confirm that Liveo Research, as a supplier within the meaning of Article 16(1) PPWR, ensures that the information obligations arising from Article 16 PPWR for our films are fulfilled and that you are provided with the necessary information and documentation to prove the conformity of the film supplied. This will concern confirmation of compliance with the requirements for substances in packaging pursuant to Art. 5 of the PPWR. In addition, we will provide those parts of the technical documentation pursuant to Annex VII of the PPWR that apply to the films we supply and that we can reasonably obtain and provide.

Geschäftsführer:

Andreas Pfefferle

In addition, we will provide all additional information required by the relevant EU legislation for contact-sensitive packaging that comes into direct contact with pharmaceutical products (e.g., material tests and legal compliance certificates to ensure that no substances harmful to health are transferred to the packaged product, Art. 16 (2) PPWR). We are also available to answer any questions you may have so that you can ensure the conformity of the packaging you manufacture using our films.

The same considerations also apply to a required blanket confirmation of compliance with the Packaging and Packaging Waste Directives 94/62/EC and 2018/852/EU. The film we supply does not constitute packaging even under these directives. In this respect, the above argumentation can essentially be applied. Regarding the directives and their national implementations, we can basically only confirm compliance with the requirements for substances in packaging and packaging materials and the concentration limits for certain substances/heavy metals.

We therefore ask for your understanding that we are unable to provide a general yes/no beyond the above statements regarding compliance with the requirements of the PPWR and the Packaging and Packaging Waste Directives 94/62/EC and 2018/852/EU. We therefore ask you to review this statement internally to determine whether, in your opinion, it constitutes a sufficient declaration of compliance with the requirements of the PPWR as a supplier of packaging materials, if it applies to the films supplied by Liveo Research (keyword: primary packaging) as agreed.

If you have further questions, please do not hesitate to contact us.

With kind regards
Liveo Research GmbH
