

Position of Gualapack Pharma regarding Reg 2025/40 “Packaging and Packaging and waste regulation”

Dear Customer,

About **Regulation (EU) 2025/40**, following the communication received from our raw material suppliers, an official statement will only be available starting from the date of application of this Regulation.

The aluminum used by Gualapack Pharma does not contain recycled material; however, all production discard is recovered and disposed of for recycling purposes by authorized entities. All packaging materials are already minimized to what is necessary to ensure product safety, and alternative materials are currently being evaluated to guarantee a lower environmental impact.

Regarding the total concentration of heavy metals, the limit of 100 ppm is complied with as the maximum sum of Pb, Cd, Hg, and hexavalent Cr, which are not intentionally added during the material manufacturing process, in accordance with the following applicable provisions:

- Directive 94/62/EC and subsequent updates and amendments – Article 11
- UNI EN 14287 Aluminum and aluminum alloys – Specific requirements for the chemical composition of products intended for the manufacture of packaging and packaging components
- Legislative Decree No. 152 of April 3, 2006 – Part Four / Title II / Article 226 / paragraph 4
- CONEG Legislation

Regarding substances such as perfluoroalkyl substances (PFAS), including perfluorinated compounds (PFOA or PFOS), these are not intentionally added and are not expected to be found.

At present, the information provided to us regarding the Regulation, and specifically in relation to your request, is limited to what is stated above.

We will continue to monitor the situation concerning compliance with the Regulation and will update you as soon as the final certification becomes available.

Kind regards

Quality Manager

Roberta Grassi
