DECLARATION

OBJECT: REACH (SVHC)

Glass containers made by Alphial do not contain substances that are intended to be released under normal and foreseeable circumstances and are therefore not concerned by registration obligations according to Article 7.1 of the REACH Regulation.

Article 33.1 of the REACH Regulation only requires a supplier to inform its customers if the article contains a substance of very high concern (SVHC) above 0.1% (w/w).

Raw materials used during glass manufacturing undergo a physical and chemical process (melting) where they are transformed into a new substance, namely glass. These raw materials are no longer present in the newly formed glass substance. They cannot be either isolated or released.

Yours sincerely,

Lidia Comi
Group Quality Director
