Reach Declaration of Conformity

Dear Customer,

We herewith confirm the following:

All primary glass packaging products made of Type I glass (ampoules, vials, cartridges and syringe barrels) supplied by SCHOTT Pharma AG & Co. KGaA comply fully with the Reach Declaration of the European Community.

Our container material "Glass" is listed explicitly in the ANNEX V (11) as an exemption:

"ANNEX V: EXEMPTIONS FROM THE OBLIGATION TO REGISTER IN ACCORDANCE WITH ARTICLE 2(7)(b)

*11. The following substances unless they meet the criteria for classification as dangerous according to Directive 67/548/EEC and provided that they do not contain constituents meeting the criteria as dangerous in accordance with Directive 67/548/EEC present in concentrations above the lowest of the applicable concentration limits set out in Directive 1999/45/EC or concentration limits set out in Annex I to Directive 67/548/EEC, unless conclusive scientific experimental data show that these constituents are not available throughout the lifecycle of the substance and those data have been ascertained to be adequate and reliable: **Glass, ceramic frits.**"*

Please note also the Statement of our glass tubing supplier SCHOTT AG Business Unit Tubing in the amendment 1.

Position on Art. 33 / REACH & SCIP concerning glass products

Dear Sir or Madam,

This letter is for REACH information for the named products listed here below:

Glass Tubing and Glass Rods from SCHOTT AG, Business Unit Tubing

We would like to take this opportunity to inform you about the SCHOTT position concerning the legislative requirements given by Art. 9(1)(i) and 9(2) EU Waste Framework Directive (98/2008/EG; SCIP) with reference to Art. 33, REACH Regulation (1907/2006/EG; SVHC).

The current major chemical legislation of the European Union, REACH, entered into force on June 1st 2007. It regulates the manufacture, the import, and the placing on the market of substances, substances in mixtures, and substances in articles. REACH in its complexity makes clear distinctions between 'substances', 'mixtures' and 'articles', and requires different actions to the relevant producers, to enable them to comply with the law.

In particular, we are aware of our duties as a supplier of 'substances', 'mixtures' and 'articles' according to Art. 33 REACH regulation.

We are obliged to provide information to our customers (downstream-user information) regarding substances contained in our products that

- a) are listed on the candidate list of substances of very high concern (SVHC)
- b) in an amount (w/w) of higher than 0.1 wt-%.

Since our products consist mainly of tempered glass and since glass, as a 'substance' itself (CAS 65997-17-3), is not included in the candidate list, currently our glass products are exempt from this information duty under REACH. For the production of tempered glass and molded parts, we may use other 'substances' besides glass, which may be already included on the candidate list. But those 'substances' are completely incorporated in the glass matrix forming the new 'substance' glass while losing their former specific properties.

SCHOTT AG, Location Mitterteich

Chairman of the Supervisory Board: Dr. Michael Bolle

Board of Management: Dr. Frank Heinrich (Chairman), Hermann Ditz, Dr. Heinz Kaiser, Dr. Jens Schulte

Deutsche Bank AG, Mainz · Sort Code 550 700 40 · Account Number 0 123 265 00 · SWIFT: DEUTDE5M · IBAN-Nr. DE71 5507 0040 0012 3265 00

F-PTR-1921 GB / index 8 / 22.12.2022 / VW-MAAM

Only in the case of improper handling, possibly small amounts of the network components could again be available in oxidic form. In this not recommended case, their specific characteristics must be taken into account in the obligate risk assessment. Therefor refer to the materials' specific material datasheets (MDS) or safety datasheets (SDS).

Based upon our review of the information provided to SCHOTT AG, Business Unit Tubing by its suppliers, we confirm that the products listed above do not contain materials included in the current SVHC candidate list, nor are any such substances present in the products above the applicable threshold (0.1%).

The current candidate list of SVHC can be located at:
<http://echa.europa.eu/candidate-list-table>

The duty for provision of respective information as well via the SCIP database (Waste Framework Directive) is explicitly connected to the information duty Art. 33 / REACH. As our glass products are not subject to Art.33, there is not duty for notification in SCIP also.

The information given in the present declaration is based upon the current level of our knowledge and is intended to provide information about our products. It should therefore not be construed as guaranteeing specific properties. Buyer or user are responsible for ensuring that the products they use, as supplied by us, comply with the specific requirements of their intended application. Due to the progress (evolution) of national and international regulations and laws, the status of the listed product could eventually change. If you have any doubt relating to the current correctness of this declaration, please contact us for an update.

Sincerely,

SCHOTT AG
Business Unit Tubing
