
Absence of chemicals in FM series uncoated rubber compounds

According to the formulation and manufacturing recipes of our FM series compounds, we confirm that the below listed chemical substances under 1) and 2) are not intentionally added as raw material ingredients.

1) The absence of below substances are derived from general knowledge of the formulation and raw materials. Though very unlikely, it does not exclude the presence of negligible traces due to e.g. impurities in the components supplied by external parties:

- Organomercurials
- Parabens
- Benzophenones
- Benzoates
- Bisphenol A and other bisphenols
- Asbestos
- Gelatine
- Dimethylfumarate
- Melamine
- Ethylene glycol, Diethylene glycol, Propylene glycol
- Diethanolamine
- PVC (Polyvinyl Chloride)
- Allergens: Gluten, lactose, sugar, peanuts, wheat, eggs, milk protein, sulfites, fish/shellfish, corn
- Aflatoxins
- Nitroso-compounds
- Nitrating agents
- Hydrazines, triazenes, azides
- Azo- and Azoxy- compounds
- Polyhalogenated dibenzodioxins and dibenzofurans
- Steroids
- Biocides
- Alpha-nitro furyl compounds
- Galactomannan
- Genetically Modified Organisms
- 2-mercaptobenzothiazole (MCBT, also named MBT), or any of its derivatives*
- Iodine
- Per- and polyfluorinated substances (PFAS)
- Triphenyl phosphine oxide
- Recycled materials
- Free nanomaterials
- Carrageenan
- Persistent Organic Pollutants (POP) according to regulation 2019/1021
- Substances of Very High Concern (SVHC) according to the REACH Regulation (Legal Reference EC 1907/2006; update February 4, 2026)
- Substances of concern according to California Proposition 65, requiring the labelling of products containing any of the chemicals known to cause cancer, birth defects or other reproductive harm

(Legal Reference Safe Drinking Water and Toxic Enforcement Act of 1986; update December 8, 2025)*

- Substances listed in RoHS 2 and China RoHS (Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent chromium (Cr⁶⁺), Polybrominated biphenyls (PBB), Polybrominated diphenyl ether (PBDE)) (Restriction of Hazardous Substances Directives directive 2011/65/EU)
- Phthalates, including the four phthalates mentioned in the RoHS 3 declarable substance list (Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP)) (Amendment to EU RoHS 2 Directive; Legal Reference Directive EU 2015/863)

2) The below statements are derived from actual material testing.

- The FM series formulations comply with the EC Guideline 94/62/EC for heavy metals in packaging materials and the CONEG regulation on reduction of toxics in Packaging Law.
- The potential extractable amount of PAH's (Polynuclear Aromatic Hydrocarbons) for the FM series formulations are, if even present, at ppb-level.

This confirmation applies to the rubber products as it leaves its manufacturing facilities and does not cover any further treatment thereafter.

This confirmation statement replaces all previous ones related to this matter.

Hardeman, Tine
Manager Material Development

**This statement is valid for all FM-series compounds, except compound FM603*
