Compliance statement on sheetfed offset (printing inks and waterbased coatings)

All Sun Chemical products are formulated in accordance with the 8th edition of the EuPIA Exclusion Policy of April 2025 and Sun Chemical's raw material selection and approval procedures ensure compliance with this policy.

This excludes from use all materials classified according to the CLP Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures as carcinogenic, mutagenic or toxic for reproduction in categories 1A or 1B with hazard statements H340, H350 or H360*, in addition to toxic or highly toxic materials with hazard statements H300, H301*, H310, H311*, H330, H331, H370 or H372* (*may be permitted if safe use can be demonstrated following risk assessment).

Pigments based on compounds of Sb, As, Cd, Cr (III and VI), Pb, Hg, Ni, Se, Sr, Sn, certain dyes, solvents, plasticisers, and miscellaneous materials are also excluded. See www.eupia.org for further information.

None of the following substances are intentionally used in Sun Chemical sheetfed offset printing inks or waterbased sheetfed offset coatings:

- Ozone-depleting substances, like halogenated hydrocarbons (e.g. CHC and/or CFCs)
- Poly chlorinated Naphthalenes (PCN), short-chain chlorinated paraffins (SCCPs) and other chlorinated polymers (CPs)
- Poly Chlorinated Dibenzo-Furans (PCDF) & Dibenzo-p-Dioxins (PCDD)
- Poly chlorinated Terphenyls (PCTs)
- PVC (Poly Vinyl Chloride) or PVDC (Poly Vinylidene Chloride)
- Formaldehyde, Formamides, Acetaldehyde (H3C-CHO) & Acetamides
- Brominated compounds (such as Penta-Bromo(penta-BDE), octa-Bromo-Di-phenyl Ether (octa-BDE) and/or Poly brominated Di Phenyl Ethers(PBDEs) = organo poly bromine compounds, Hexabromo cyclo dodecane (HBCD), etc. – known as Flame retardants
- Acrylonitrile (H2C=C-CN)
- Epoxy derivatives (BADGE, BFDGE, NOGE)
- Asbestos
- Flame retardants based on phosphoric acid esters (like TCEP, TCPP and TDCP)
- Per- and polyfluoroalkyl substances (PFAS) such as PFOA, PFUA, PFAS or PFOS, PFUS etc. (not including PTFE wax)
- Alkyl- and Nonyl-Phenols
- Alkyl- and Nonyl-Phenol Ethoxylates
- Azo dyes
- Primary Aromatic Amines (PAAs)
- Bis-Phenols (like Bis-Phenol A (BPA) or Bis-Phenol S (BPS) etc.)
- Nitrosamines

Disclaimer:

Sun Chemical products are intended for sale to professional users. The information herein is general information designed to assist customers in determining the suitability of our products for their applications. All recommendations are made without guarantee, since the application and conditions of use are beyond our control. We recommend that customers satisfy themselves that each product meets their requirements in all respects before commencing a print run. There is no implied warranty of merchantability or fitness for purpose of the product or products described herein. In no event shall Sun Chemical be liable for damages of any nature arising out of the use or reliance upon this information. Modifications of the product for reasons of improvements might be made without further notice.

- Epoxidized Soybean Oil (ESBO)
- Organic tin compounds
- Di-Methyl Fumarate (DMF)
- N-Methyl Pyrrolidone (NMP)
- Pesticides (like ortho-Phenyl-Phenol = o-PP; E 231)
- N-Ethyl Pyrrolidone (NEP)
- Parabene's (p-Hydroxy Benzoic acid esters)
- Latex
- Allergenic substances as per Annex II of (EU) No 1169/2011
- Triclosan, Camphor Benzalkonium Methosulfate
- BTEX (Benzene, Toluene, Ethylbenzene (o-, m-, p-) Xylenes)
- Components derived from genetically modified materials (from GMO sources)
- Animal by-products and animal derived materials
- Benzophenone, 4-Methyl-Benzophenone and other substituted Benzophenones
- Conflict Minerals (i.e. cassiterite, columbitetantalite, gold, wolframite or their derivatives (including tin, tantalum and tungsten)
- Palm Oil, Palm Kernel oil and/or derivatives
- Plasticisers based on phthalates (such as DEHP (DOP), DiNP, DiDP, DnOP, DBP, BBP, DiBP, DEP, DMP, DNP or DHP)
- SVHC (Substances of Very High Concern)
- Polycyclic aromatic hydrocarbons (PAHs)

We hereby confirm that in the production of all Sun Chemical sheetfed offset printing inks or waterbased sheetfed offset coatings, genetically modified organisms (GMOs, GVOs) are not being used as intentionally added components.

In the manufacture of sheetfed offset printing inks, soybean oil and/or soybean oil fatty acid derivatives are sometimes used as additives. A large proportion (approximately 70%) of the soybean oil, traded globally, mostly is coming from genetically modified crops. Consequently, it is very likely that soybean oil, used for the manufacturing of printing inks, at least partially might be of genetically modified origin. On the other hand, by the processes of extraction and refining of such an oil, any genetic material (DNA, RNA and proteins) will be removed and will be identical to any oil from conventional cultivation. The same reasoning applies to rapeseed oil, also used in printing inks; however, the share of oil from genetically modified crop growing is considerably lower.

Therefore, whilst the complete absence of genetically modified products cannot be guaranteed, their presence in printing inks as supplied would be many orders of magnitude lower than the 0.9 % labelling obligations of Commission Regulation (EC) 1829/2003 (Art. 12) and Directive 2001/18/EC (Art. 21) (amended by Regulation 1830/2003), with respect to the genetically modified material content in the actual packaged food.
