

Regulatory Statement

On the presence of MOSH and MOAH in conventional Sheetfed Offset printing inks

To whom it may concern

Sun Chemical Regulatory and Product Stewardship department have examined the following Sheetfed Offset printing inks series:

- SunPak FSP EcoPace (FEPxx and FEBxx)
- SunPak LMQ (LMQxx and LMBxx)
- SunPak Irocart (IROxx)
- SunLit Diamond (DIAxx)
- SunLit ProPace (PRPxx)
- SunLit Crystal (CRLxx)
- SunLit EXACT PSO (EXAxx)
- SunLit OptiPace (OTPxx)
- SunLit Intense (INTxx)
- SunLit Triumph Max (TPHxx)
- SunLit Express (EXPxx)
- SunLit Publish (PBLxx)
- SunTec V-Foils (VFPxx and VFBxx)
- SunTec Label FS (LFSxx)
- SunLit V-POSTER (VPTxx)
- MSB (MSBxx)
- Pantone (NPSxx)

Article 112 of the French Decree No. 2020-1725 on the 'Fight Against Waste and the Circular Economy' regulates the use of mineral oil on packaging and free advertising. The article prohibits mineral oil containing substances that interfere with waste recycling and provides the following definitions:

- MOH = Mineral Oil Hydrocarbons
- MOAH = Mineral Oil Aromatic Hydrocarbons consisting of 1 to 7 aromatic cycles
- MOSH = Mineral Oil Saturated Hydrocarbons consisting of 16 to 35 carbon atoms

The first restrictions came into force 01/01/2023 prohibiting inks when the concentration by mass of MOAH is greater than 1%. Now since 01/01/2025 the restrictions are more demanding. Inks are banned if the mass concentration of MOAH is greater than 0.1% or the concentration of MOAH with 3 to 7 aromatic rings is greater than one part per million (ppm). Additionally, inks are banned if the mass concentration of MOSH is greater than 0.1%.

To the best of our knowledge, all the above listed products are compliant to the thresholds for petroleum hydrocarbon derived MOSH and MOAH for 2023 and 2025 based on the individual raw material suppliers' regulatory disclosures and the disclosed composition of each raw material supplied to manufacture these products.

This statement is made with the knowledge of the limitations and difficulties of the French Mineral Oil Decree as discussed in the EuPIA Information Note on French Order on Mineral Oils in Printing Inks [https://www.eupia.org/wp-content/uploads/2024/11/EuPIA-Information-Note-French-legal-texts-on-Mineral-Oils_202409_updated.pdf].

On behalf of Sun Chemical
